SUMMER SESSION SAVES YOU TIME AND MONEY

In the present crisis time is the essence of failure or success. In the great need of our country for trained men in many difficult fields young men are being deferred from military service that they may specialize in chemistry, medicine, dentistry, engineering, the ministry, etc.

But such students should begin at the earliest possible moment. The summer course permits students to cover their work much more rapidly than the old plan. They can complete the four-year course in two years and nine months. This saves fifteen months of time. The student's later income from this time saved will pay for his entire college course.

ACCELERATED PROGRAM FOR HIGH SCHOOL JUNIORS

High School Juniors with 12 units credit who rank in the upper half of their class may take a special entrance examination here in May 13 or on August 12 and enter college directly. At the end of nine months they receive the high school diploma and have a year of college credit besides. Such a junior, by taking summer work as well as winter, can complete high school and college — ordinarily requiring five years — in only two years and nine months. He saves two

years and three months of time and much expense. But above all, boys who will be called into the armed service can receive a type of training which will give them better places in the service.

OPPORTUNITIES IN CHEMISTRY, PRE-MEDICAL, DENTAL AND ENGINEERING WORK, NURSING

Because of the extreme need in all these fields we are giving this summer the entire first year of chemistry, physics, biological science, and mathematics. With this arrangement students expecting to enter nursing, dentistry, chemistry, or engineering can complete all pre-professional training by the fall of 1945 and be ready for their professional work at once.

OPPORTUNITIES FOR SECRETARIES AND TYPISTS

Thousands of typists and secretaries are needed immediately in government service. To meet this demand we are giving the entire year of shorthand and typing during the summer session. Students completing this twelve-weeks course should be able to pass the civil service examinations at the close of the summer.

OPPORTUNITIES FOR MEN GOING INTO ARMED SERVICE

Young men who expect to be called into the armed service should take advantage of the summer session to advance their training as far as possible before they are called. The Army, Navy, Marines and Air Corps all have programs for the further training of young men in special technical fields after they are called. Those with previous college work will naturally have the best chance for such training.

OPPORTUNITIES IN LIBRARY SERVICE

Because of the steady demand for men and women training in Library Science we are giving as complete schedule as possible during the summer of courses in Library Science. These courses lead to the Bachelor of Library Science degree and prepare for positions in city, county, and school libraries.

OPPORTUNITIES FOR YOUNG PREACHERS

Because of the continual need for well trained preachers the government is exempting from military service young men

who are preparing to preach. But this purpose should be well established before a young man reaches the age for military service. High school graduates who have had this purpose can begin their work in the summer school also instead of waiting till winter.

OPPORTUNITIES FOR TEACHERS

The acute shortage of teachers has made it necessary to certify high school graduates who, in the summer, may complete 12 semester hours of college work in certain fields. Harding is giving this required work this summer. High school graduates can therefore qualify in a single summer session for a certificate and for a position in the fall.

TEACHER'S CERTIFICATES

Certificates in Arkansas are as follows:—

- I. Three-Year Elementary Certificates.
- II. Four-Year Elementary Certificates.
- III. Six-Year Elementary Certificates.
- IV. Secondary School Certificates for Junior and Senior High Schools and for various fields of teaching including business administration.
- V. Certificates for Administrators and Supervisors.

REQUIREMENTS FOR DEGREES

Requirements for the Bachelor of Arts, and the Bachelor of Science Degrees are outlined in the regular catalog, which may be had upon request.

EXPENSES

It has been our intention to keep the expenses at Harding as low as possible and at the same time give our students the advantage of the strong faculty and the excellent equipment that the school offers.

The regular load consists of eight hours for the five week period, 15 for the ten week and 18 for the 12 weeks. Maximum loads run 9, 18 and 22 hours with Bible additional. For work above the regular load a charge of \$3.25 per credit hour is made.

ROOM AND BOARD

All boarding students are required to room in one of the college dormitories and take their meals at the college cafeteria.

Room for girls in Pattie Cobb Hall, the new fire-proof dormitory, are \$6 and \$7 per month. The \$7 rooms have connecting baths or private baths.

All rooms in the boys' dormitory are \$5 a month.

There are a limited number of light housekeeping apartments for families, furnished except for linens. These rent for \$15 a month.

The college cafeteria gives the most excellent service at a minimum of cost. Meals at the cafeteria are given on the basis of \$22 a month.
