Boost interaction and encourage critical thinking with our new hotspot capability!

The TurningPoint hotspot question type gives learners the opportunity to interact directly with images and opens the door to deeper learning.

How does it work?

1. Simply upload a picture into TurningPoint and designate which areas encompass the correct response.
2. Learners then click on the image to indicate their answer via a web-enabled device.
3. Instructors can easily integrate this thought-provoking question type into both live presentations and scheduled surveys and assessments.
