Failure to Get Machinery Causes Necessity of Two Work Days

Because of the difficulty to secure the necessary machinery, the Upperclassmen were forced to work on the football field to finish the season. It is estimated that it might be ready for practice by April 12, but this is a three-game season.

About one hundred students turned out to do the field work on Thursday afternoon. The whole day was spent working with the grading machines, putting in the grass and raking the field in order to get it ready for practice.

"The Place of Oil in the Life of Mankind," said Maurice, "is an important part of our lives. Oil is used in almost every facet of our lives, from cooking to transportation. It is a vital resource that we cannot do without.

The contest was held in the Upperclassmen's building, where the Upperclassmen had set up a stage and a microphone. The audience was enthusiastic and the contest was well received.

The Lambda is chosen for its academic excellence, the Phi is chosen for its leadership, and the Theta is chosen for its service.

The academy selections are made by the Upperclassmen, who consider the students' academic performance, leadership skills, and service to the community.
