Communism vs. Christianity.

Lenin, the great Russian leader, said that Communism was inevitable. It was not a new idea, and that was why he was able to get his way. But today millions of people hold to that belief. The gospel of horror that formerly accompanied that idea, and upon which is now being left off and even our people cast envious glances at the dream of a mildly socialistic America.

We are concerned about all America's attitude toward Socialism; but we are even more concerned about Communism and Socialism. Since the faculty members and students of Harding do not always agree on these matters, we shall consider certain similarities of the two doctrines.

The individual soul is the center of the theme. The individual soul is worth more than the earth. Each person exists and thrives, first of all, because he is an individual soul. God is the supreme law giver and he makes no allowances for "opportunities." If you have not been offered for earthly rationalism and the state is of inferior concern.

The Russian dreamer, Karl Marx, a decider of God, laid down principles concerning human civilization which are basically individualistic. However, let us not confuse Marx's theory of Communism with the Russian version of the faith. The two have different ideals that Russia in no sense of the word lives up to.

Karl Marx, the individual human above all and the state of little value. He planned a world that would have no world in which all people would be equal. His class struggle would be one in which people needed no government, and crime would be the end of the past. The idea of Communism would be the soul and unalterable law. Men would not act in the interest of our great—classless society.

Socialism, the first step in this plan, was to liquidate all inequalities of conditions during which the old idea of government would be destroyed and the new established.

For the Socialist, the great end is true Communism, for the Christian, it is only the dollar. But the Socialist has a god but inferior philosophy to Christianity. In its purest form it can but offer man an available god, pitiful, man, the classless society will never be reached, for Karl Marx offered no cure for human poverty.

The only principal offering perfection are those established in the Bible and God, knowing these qualities He mixed in man, offers this only after life.

When all deans of Utopias, Pantheists, Brooke barns, Shangra-Las, and Communist states are, perhaps man will finally realize that the real world is not an imperfect copy, offers salvation.
