 Change of address notices and
 correspondence should be addressed to
 the Office of Publications, Harding
 College, Box 759, Searcy, Ark. 72143.

Dedication ceremonies for the Olen Hendrix building were held on the campus September 20 naming the recently renovated Old Science Building in honor of the State Senator from Prescott, Arkansas, who is a member of the Harding Board of Trustees. The Senator and his wife, Carmen, unveiled lettering on the three-story structure which houses the department of home economics on the first two floors and the Hendrix Nursing Center, newly added department of the college, on the third floor.

Ray Thornton, Arkansas Fourth District United States Congressman who is also a member of the President's Development Council, compared the old and the new in his dedicatory address.

Senator Hendrix has sponsored major legislation over the years for the Arkansas State Hospital and has for a long time been interested in health care, being especially concerned at the shortage of qualified nurses particularly in Arkansas. He thanked the Board for naming the building in his honor. "I'll never betray the trust you've placed in me," he said.

Harding's program of nursing will offer a baccalaureate degree, the only private college in Arkansas with such a program and the first college among the brotherhood of the Churches of Christ to offer a baccalaureate in nursing.

Congressman Thornton paid tribute to the South Arkansas businessman, president of the Bank of Prescott

(Continued on next page)

Raked seating in classroom permits ideal instruction visibility.

Serviceable equipment supports laboratory of home economics department.

and the Bank of Delight, as "one who has maintained his religious faith while remaining dedicated to his family and to the principles of justice. He is an ideal of faith, loyalty and character," he said.

Thornton commended the college for the effort in establishing the department of nursing and complimented the college for "being concerned with the health care of others." Also, he cited few areas more important than the home and praised the dedicating of a part of the building to teaching of home economics.

"Harding, through teaching of the ideals of love and the religious basis for marriage, has had a profound effect on the qualities of life necessary for good homes," Thornton told the audience.

"We are recognizing the old and tested values, a continuing application of old values to new ideals. In this building we have an example of a continuing example of applying eternal values to present life. And isn't that the measure of the worth of a man's life — how well we relate and apply eternal values around us to eternal life?"

The building is one of two original structures on the campus when Harding moved to Searcy from Morrilton in 1934. Through the years it has housed the administrative offices and classrooms, as well as the natural science division and the home economics department. During the past year the building was stripped to the four walls and completely renovated. A stairway complex was constructed on the east side of the building so that the interior could be utilized efficiently.

President Clifton Ganus was in charge of the ceremonies at which the Band presented a program of music. President Ganus read expressions of congratulations from several, including Arkansas Governor David Pryor.

Addressing the audience during the ceremonies were Senator Clarence Bell of Parkin; Dr. Mildred Bell, chairman of the home economics department, Mrs. Michele Warren, chairman of the department of nursing; Kirk Davis, president of the Student's Nurses Association; Dr. Richard Burt, chairman of the Board of Trustees; Dr. James Carr, who gave the invocation; and Dr. Bill D. Stewart of Little Rock, who pronounced the benediction.

Mrs. Warren called August 28, 1975, "the most important day of my life as far as education is concerned." She met with the first professional nurses class ever to assemble at Harding College. Harding's program has been limited to a two-year pre-professional program in the past.

Mr. and Mrs. Hendrix removed the covering on the plaque in the entrance corridor of the building and also a third floor plaque which designates the floor as the "Hendrix Nursing Center." Tours of the facilities followed.

The nursing class has 54 students and there are 139 home economics majors this year. □

New equipment to assist instructional and administrative operations

A WISE program has been introduced at Harding.

An acronym for Wheaton Information System for Education, WISE is one of the major "software" systems or set of programs for the new computer recently purchased by the college. The system is designed to aid the academic and research programs and to speed the flow of information between various administrative offices.

Technically known as the PDP 11/45, the electronic or "hardware" elements were manufactured by the Digital Equipment Corporation to fit the specific needs of the college. The computer is housed in the basement of the administration building, but 21 remote terminals located in various offices and classrooms will provide instant access to the stored information. Ten of these terminals will be used solely for academic instruction purposes.

Heading the facility is Gene Dugger, a member of the Harding mathematics faculty since 1969. He is currently working on requirements for a Ph.D. degree in computer science at the University of Missouri at Rolla.

Assisting in the administration of the facility are John Nunnally and Gene Ward. A 1973 graduate of Harding, Nunnally is in charge of programming and will also be teaching part-time as a member of the mathematics faculty. Ward, a retired Air Force computer specialist, is the chief of operations and maintenance. They are aided by six part-time student workers who are writing programs specially designed for Harding's needs.

The program was planned and implemented by a committee appointed by President C. L. Ganus on Dec. 2, 1974. Under the leadership of Dr. Billy Ray Cox, the

committee made a technical in-depth study to determine the best system for Harding's needs at the lowest possible cost. Several computer vendors were invited to present their systems, and after a thorough consideration of the services, cost, maintenance, and recommendations of other institutions, the committee suggested the purchase of the Dec. 11/45.

Larry Alexander, the Dallas Branch Manager for DEC, noted the unusual efficiency of the selection committee. "The entire selection process took only about four weeks, which is exceptionally fast for this type system. Typically the selection would take from four to six months."

WISE was originally designed at Wheaton College for on-line computerization of registration, admission, and alumni records, but has expanded into a system of 57 different programs handling nearly every phase of college administration. The programs will facilitate the ease of record keeping and give instant access to files of all alumni, current students, and those who have applied for admission.

Perhaps the major single user of the system will be the business office. Byron A. (Buddy) Rowan, Comptroller of the College, explained, "Efficient use of the computer's speed will be used in processing the payroll, accounting and budget records, student loan accounts and current student accounts. We will be able to provide fast, accurate, detailed information, and save some of the confusion that usually goes along with business records."

Dugger noted that one of the advantages of the system is the elimination of registration "day." This activity will

Gene Dugger, left, and John Nunnally handle Harding's programming.

be scheduled with the student and his advisor during the school year. The advisor will, with the help of a computer terminal, be able to complete all registration procedures in a matter of minutes.

While the computer will aid administrative offices with fast access to data, Dugger emphasized that one of the primary benefits will be to help students in their particular fields of study.

"Students will be given every opportunity to know how the computer is used in their fields," Dugger said. "We are also contemplating a minor in computer applications that could go along with almost any major field of study that a student might choose.

"For example," Dugger continued, "a student in the new nursing program would benefit greatly from the computer's speed of calculation in the simulation of actual crisis problems. This would accelerate his knowledge and give him an opportunity to be acquainted with situations he might not have time to study in a regular learning situation."

Closely akin to the simulation aspect, another possible use of the computer is CAI (computer assisted instruction) which allows students to proceed at their own rate and frees the instructor from teaching the understood material, thus allowing him to give individual attention to the students having problems.

For those interested in its electronic configuration, the computer and its accompanying disk drive memory unit

Cathode Ray Tube (CRT) terminal gets input of departmental program.

have a core storage capacity of 192,000 characters and a capacity of over 80 million characters in secondary storage. In layman's terms, this is roughly the storage capacity of ten full four-drawer filing cabinets. In addition, each data packed magnetic tape will hold the information of approximately 500,000 punched cards.

Called a "time-sharing" system, the computer will allow up to 16 users to recall information simultaneously. The PDP-11 will eventually be expanded to allow 32 terminals to be in operation at once. The main type of terminal used is a CRT — cathode ray tube — similar in appearance to a television with a keyboard attached. This practically silent unit displays information on the screen and makes paper-free information available instantly. If a permanent record of the account is needed, the control can be given to a printing device which will make a "hard" copy.

The \$200,000 system is now in its shakedown phase to "de-bug" the programs and to set up the data files for the user's records. Final input of student and alumni files is expected to be complete by November 1, with trial operations to parallel the present system until a smooth transition can be made. Full computer operation should be in progress by July, 1976, with the first computer registration the following fall semester.

"We view the computer system as a service which will benefit the entire Harding community," Dugger said. "Our goal is to get correct information to the right people when they need it." □

Harding Accreditation Confirmed

By charter, by design and by tradition, Harding College is a conservative, Christian college where Christian values are stressed and where the Bible is taught as the revealed word of God.

Additionally, within the realm of academe, Harding is an educational institution committed to academic excellence and student growth and achievement. In educational circles, how well a school is fulfilling its responsibilities is determined periodically in an evaluation by a national accrediting agency. In Harding's case, the agency is the North Central Association of Colleges and Secondary Schools.

Accreditation means that Harding students are assured that credits earned at Harding will have transfer value to other institutions, on both the undergraduate and graduate levels.

In February of this year, a five-man team of educators visited the Searcy campus for the purpose of evaluating the Harding educational program. Headed by Philip Denenfeld, Associate Vice President for Academic Affairs at Western Michigan University, the investigative team studied every possible area of operation of the college in gathering data for the report.

At the late summer meeting of the agency, it was recommended that Harding College be "continued on full accreditation at the undergraduate and master's level, and that the institution be placed on the decennial evaluation schedule."

In the committee's report, Harding was described as "an institution with a clear sense of educational purpose, to which all of the constituent elements are committed and which they carry out very successfully. The college has consistently attracted and retained capable students and competent, dedicated faculty and staff. Morale is extremely high."

Dr. Joseph E. Pryor, Dean of the College and Vice President for Academic Affairs, indicated the examiners were "remarkably thorough, looking into every possible division of the college.

"They met with Board members, local businessmen, departmental chairmen and members of our faculty and student body, looking closely into all aspects of the college's organization and operation."

Originally accredited in 1954, Harding has undergone evaluations in 1955 and 1969. In 1958 and 1961 specific evaluations of the graduate degree program were examined.

Accreditation evaluations are an all-inclusive, in-depth look at the operations of an institution. Preparation by the college is exhaustive, with a 210-page self study report being prepared by faculty committees under the direction of Dr. Pryor.

Several factors, according to the report, were considered to be institutional strengths of the college. Among these were 1) A clear sense of institutional purpose; 2) A strong commitment to the College; 3) A dedicated, capable, open administration; 4) A well-developed source of student enrollment and financial support within its alumni and its faith; 5) A broad-based development program; 6) A committed, active Board of Trustees; 7) Continuing strong support of the college library; 8) Strong institutional support of faculty development, and 9) A commendable physical plant.

Other members of the evaluation committee were William L. Fisk, Executive Vice President and Dean of Muskingum College, Kenneth L. Janzen, Vice President for Academic Affairs, Hamline University; Frank Laycock, Professor of Education, Oberlin College and Gordon E. Wesner, Vice President and Dean of Rockford College. □

Campaigners Sow the Seed

By Alice Ann Kellar

Unemployment, a national problem especially during summers for college students, was no hazard for a portion of Harding's student body again in 1975 with many using their summer recess from the classroom in evangelistic campaigning. Their efforts covered much of the United States, parts of Europe, South America, and Jamaica. They worked in small groups, in large groups, in week-long campaigns, in summer programs, year-round operations and individually, but their message was common — to share the message of Jesus Christ.

Harding students from both the college and the Academy joined forces with other Christians from around the United States and the world.

To pinpoint success with numbers soon becomes futile, as no actual tally can be recorded since each is so distinctively unique. And the numbers change daily, with the "leaven" planted by the workers continuing to spread. But a survey of places visited by the groups shows positive results in every stop.

Whether the most results come from the persons being taught, the host or sponsoring congregations, or the ones teaching are also hard to identify. The workers agree almost unanimously that they themselves are rewarded most of all. The students are drawn closer to each other as friends and they find renewed faith as they grow.

A senior campaigner said, "Campaigning was an experience I wish all Christians everywhere could share. All of a sudden I found myself knocking on the door of a person I had never seen in a place I'd never been, fully realizing that I could be the difference in this person's spiritual life or death. I developed a compassion for people that I never had before, and I had to study the Bible like I never had before."

Without exception, various members of the faculty and administration receive letters throughout the year from resident members or host families where campaigns have been conducted. They praise the young people, most often for their dedication and enthusiasm. The college workers seem to be able to arouse vigor and new interest among congregations where activity has been limited.

An actual beginning time for the campaign work is also hard to pinpoint. Students and leaders meet throughout the entire year in preparation for the campaigns.

One such movement, called May Campaigns, is planned by the elders at the College Church of Christ in Searcy. This year about 200 students and leaders assisted in 10 gospel meetings in the Little Rock area. The workers canvassed the city during the day, knocking doors and inviting residents to the services. The students also would arrange Bible study sessions with those interested.

A resident member from one church said, "The young people who came here were a great group of Christians and are a tribute to Harding College. The members of the church, the young people, and the people in the community were impressed by them."

Another group of Hardingites, led by Dr. Winfred Wright, spent six weeks on a study-campaign in France. The students must have finished two years of French to make the tour with the professor, who is a former missionary to that country. The students spent three weeks in a campaign, this year in Namur, Belgium and Lausanne, Switzerland. The final three weeks are spent on a camping study tour of the country, for which they receive college credit.

Campaigns Northeast, headed for many years by Owen Olbricht, divides students into groups to spend the summer in several states, working with churches, mission points, and children's programs. Seventy were selected this year and training sessions were conducted on the Harding campus throughout the fall and spring semesters for the students who worked in Maryland, Rhode Island, Massachusetts, Ohio, New Jersey, Michigan, Pennsylvania and Virginia.

A new effort this summer was Campaigns Northwest, organized and directed by Don Bendinelli, a May graduate, and Dr. Obert Henderson, associate professor of business. Both men are former residents of the Northwest. Four cities in Washington, Idaho and Montana were the sites for work done by the group of 26.

Hundreds of Brazilians heard Harding campaigners singing during the second annual Downtown Campaign in Belo Horizonte.

L. V. Pfeifer of the Harding Bible department directed the Brazilian effort with about 20 Harding students participating. "Their coming makes Heaven more enticing" was the comment of one missionary concerning their work. John L. Pennisi, last year's visiting missionary who has returned to his field in Sao Paulo, was the host. The campaigners invited residents to services, distributing thousands of pieces of literature in the process.

As a side note, 13 campaigners donated blood on one occasion for a hospitalized friend. Several plan to return to work in Brazil permanently.

International Campaigns, planned from the Harding campus for several summers, this year had 150 workers in five countries. The students work with missionaries of the countries, inviting, distributing, and teaching.

A missionary from a congregation where the campaigners worked wrote, "This is one of the finest groups of young people I have ever known. We had no trouble or problems with any of them. Thanks for making it possible for them to work in Europe."

The Alpha class of the Christian Communications Program planned all year for a campaign to Jamaica as a part of preacher training. A group of 27 made the trip.

Ed Sanders, who with L. V. Pfeifer arranged the work, said that the students of the CCP will go to the West Indies each summer. "We can expose the CCP trainees to West African culture there without having to travel thousands of miles," he said. Assisted by the missionaries in Kingston, followup work will be conducted there by the students of the Jamaica School of Preaching.

Methods of sponsoring the trips are variable as some of the students are sponsored by their home congregations and others work at odd jobs on campus to finance their work. The funds are sometimes subsidized by hosts at the sites of the campaign.

Singing has proved to be a vital benefit in the work as the young voices gathered in chorus on a courtyard or hotel lobby attract attention of many.

The A Cappella chorus has made several tours to Europe and another is planned for the summer of 1976.

No sooner is a campaign ended than plans are being started for another. Already on the campus groups are meeting regularly for next year's effort. By graduation next spring, the funds will be secured, bags will be packed and another collection of workers will disperse to continue their goal — taking the gospel to every creature.

news, notes

HOMECOMING SET NOV. 5-8 WITH "ANNIE GET YOUR GUN"

Plans for the Bison-ennial, 1975 Homecoming celebration, set for November 5-8, are being completed daily with attendance expected to exceed all previous records.

"Annie Get Your Gun" will be played four nights with a student cast headed by Miss Pam Paul of Hurst, Texas, and Tom Lawson of Southaven, Mississippi. The show will be at 8 o'clock in the main auditorium.

The distinguished alumnus will be announced at the Black and Gold banquet on Friday night at 5:30 in the Charles White cafeteria. Harold Hazelip of Memphis, and Jim Bill McInteer of Nashville will also be featured at the banquet.

The complimentary Alumni Breakfast at 7:30 a.m. Saturday will be held in the Hammon Student Center. The 25-year-class, 1950, will be in charge of chapel at 9:30 a.m. Saturday.

Special pre-game ceremonies will begin at Alumni Field at 1:40 Saturday and the Bisons will meet the Muleriders of Southern State at 2 p.m.

A message center will be located in the Heritage Building on campus where other reunions and meetings will be announced upon registration.

TRIO OF PROGRAMS PLANNED FOR 75-76 YEAR

Three presentations by professional groups will be a part of the 1975-76 Lyceum Series and reserved tickets for the shows are available.

The National Players of Washington, D.C., will present a "Cavalcade of America" on Dec. 8; a piano duo team of Hornibrook and Webb, members of the faculty at Indiana University, will perform Jan. 23 and tenor Rolf Bjoerling will sing Feb. 27.

All performances will be at 8 p.m. in the Main Auditorium. Tickets are \$2.50 each and may be ordered through the Harding Business Office.

CROUCH NAMED DIRECTOR; ALUMNI, PLACEMENT MERGE

David C. Crouch, who has been assistant director of information and publications at Harding College since 1970, has been named the college's Director of Placement-Alumni, a new office formed by combining the Placement and Alumni offices into a single office.

Buford Tucker will retire as Executive Secretary of the Alumni Association in December, a position he has held since becoming associated with the college in 1957. Dr. David Burks resigned as Director of Placement to devote full time to his assignment as chairman of the department of business.

The Placement-Alumni Office will function in two areas, helping graduating seniors find employment and coordinating the various activities of the Harding College Alumni Association.

A native of Oxford, Alabama, Crouch attended Harding from 1966 to 1970, graduating with a degree in biology. He is a member of the Arkansas Association of Placement Personnel, Southwestern Placement Association and the College Placement Council.

Mrs. Crouch is the former Lola Murry of Hattiesburg, Mississippi. They have two children, four-year-old Tracy and four-month-old Eric.

ARE YOU MOVING?

If you are planning a move, a change of address, or perhaps if you are receiving an incorrectly addressed Bulletin, please let us know.

According to our second class postal permit, each returned publication costs us 10 cents. Help us save by letting us know ahead of time if you plan an address change. Thanks, — The Editor

ANNUAL PREACHERS' FORUM PLANNED MARCH 16, 1976

The eighth annual Harding College Preachers' Forum has been set for March 16, 1976, with "Establishing Biblical Authority" as the theme. The all-day meeting will include six lectures and two open forum discussion sessions.

The morning sessions will have as speakers Hardeman Nichols of Ft. Worth, Tom Warren of Memphis and Roy Deaver of Ft. Worth. Ed Sanders of the Harding Bible faculty will moderate the panel with the three speakers as discussion leaders.

Following lunch, the speakers will be Everett Ferguson and J. D. Thomas of Abilene, and J. D. Bales of Searcy. Jerry Jones, chairman of Harding's Bible department, will serve as moderator for the open discussion panel to close the Forum.

All sessions will be held in the American Heritage Center on the Harding campus.

2,601 STUDENTS ENROLLED; ATTENDANCE RECORD SET

Harding College's record fall enrollment of 2,601, a five per cent increase over last year's record of 2,467, included students from 21 foreign countries and every state with the exception of Idaho and Rhode Island. Again, Arkansas residents lead the list with 693, also a five per cent increase over last year's 657, and for the first time in several years students from Illinois and Louisiana exceeded the century mark with 106 and 105, respectively.

Other states with more than 100 are Alabama, 108; Missouri, 188; Tennessee, 184 and Texas, 264. Of the 52 from foreign countries, 12 are from Rhodesia.

By classes, 751 are freshmen, 598 sophomores, 569 juniors and 604 seniors.

Bible majors number 200 to lead the listing, although education majors, listed separately in categories of elementary, secondary and special, total 262. The listing includes 172 accounting majors, 140 nursing majors 128 physical education majors, and 119 home economics majors. Of the 158 enrolled in the pre-professional programs, 64 are listed in premedicine.

Women outnumber the men by 55, with 1,328 ladies and 1,273 men registered.

In the fall of 1965, enrollment reached 1,472, an increase of more than 200 from the previous year. The number has climbed each year, with the current figure representing a 76 per cent increase in the decade.

PRYOR ELECTED PRESIDENT OF ARKANSAS DEANS

Dr. Joseph E. Pryor, Dean of the College and vice president for academic affairs, was elected president of the Arkansas Deans Association for 1975-76 at a meeting held at Arkansas State University in Jonesboro. Dr. Pryor also held the office in 1961-62.

Dr. Pryor, a 1937 graduate of Harding, joined the faculty in 1944 and has served as dean of the college since 1960. He is national secretary-treasurer of Alpha Chi national honor scholarship society and recently has been included in Outstanding Educators of America, Who's Who in America and the Directory of International Biography publications.

GRADUATE SCHOOL DEAN NAMED FULL PROFESSOR

Dr. Harold Hazelip, Dean of the Graduate School of Religion in Memphis, has been promoted to full professorship in Christian doctrine. He has served as Dean since the retirement of Dr. W. B. West in 1973.

Dr. Hazelip is a graduate of David Lipscomb College and holds the B.D. from Southern Baptist Theological Seminary and the Ph.D. from the University of Iowa.

He has served as minister of churches in Owensboro and Louisville, Kentucky and Cedar Rapids, Iowa. Currently, he preaches for the Highland church.

Dr. Hazelip and his wife, Helen, have two sons, Patrick and Jeffrey.

SMITH DISCUSSES PROJECT AT MATHEMATICS MEETING

Dr. Steve Smith, associate professor of mathematics, spoke on "Mathematical Miscellanea for Use in the Classroom" at a regional meeting of the National Council of Teachers of Mathematics in Tulsa. Dr. Bill Oldham, also an associate professor in the department, has been invited to speak at the February meeting in El Paso.

Dr. Dean Priest, chairman of the department said, "We are elated because this is the first time Harding math faculty members have been invited to speak at a meeting on the regional level."

Dr. Oldham joined the faculty in 1961. An alumnus of Harding, Dr. Smith was added to the faculty in 1971.

Correspondent Visits Campus

Robert Pierpoint, White House correspondent for CBS news, presented his "View from the White House Steps," as a part of the American Studies Program speaker series October 2.

He told the Harding audience that the five presidents he has covered "have been in most respects vastly different men, each bringing his own style to the presidency; during the years that he occupies the White House each man leaving his own marks, both by what he does and does not do."

Beginning with Eisenhower, Pierpoint noted experiences and episodes he had encountered with the presidents and gave his impressions of them as heads of state and as human beings.

He pointed out the good qualities in the Nixon administration of ending the Vietnam war and "opening up the path Moscow and Peking." Revenue sharing and the Nixon-Kissinger handling of the Middle East situation were also plus-marks.

In a question and answer session after the speech, Pierpoint commented on the Cuban Missile crisis during Kennedy's administration: "It was a serious crisis in terms of confrontation."

In referring to the recent assassination attempts on the life of President Ford, the newscaster noted that America was in a cycle of violence, where "sick people are brought out of the woodwork and are challenged to bring attention to themselves."

Pierpoint, a native of California, began his journalistic career as a free-lance broadcaster in Stockholm. He joined CBS in 1949 and covered the Korean War. He was a Far East bureau chief for CBS before being appointed White House correspondent, a position which he has held for more than 18 years.
