**O’THELLO, the Moor of Venice, is a tragedy by William Shakespeare based upon the story of the Moor in the history of Florence and is several centuries before the one-time scene of most of the play. The title of Shakespeare, however, is the name of the Moor described in the play. The Moor is in Venice, one of the chief cities of Italy. Excitement is in the air and you learn that a lady of high birth, Desdemona, has eloped with a man with whom she is not in sympathy. The Moor is jealous of his wife and is highly respected for his virtue and capability. Nevertheless, he feels that he has been cheated at the bridge and is determined to get to Cyprus where the Turks are making war on Venice.

They all meet at the Duke’s house and Othello states his case before the Duke. Othello destroys Desdemona, but he marries Cassio because he agrees that he is called forth and she confesses that this is true. The Moor set out for Cyprus, but a storm has ruined the Turkish fleet and he is taken care of without struggle.

Iago, one of Othello’s officers, has reason to believe that Desdemona has appointed Cassio, a handsome young officer, as the Moor’s new second-in-command. He conceives a scheme by which he can get revenge and immediately sets to work. Iago succeeds in the first part of his plan by coloring Cassio in the Duke’s eyes. Cassio is banished from Cassio, and convincing him that she is in love with Cassio. This of course is true, but the Moor does not discover this until he has already been married to Cassio.
