Students lend relief to state's ice storm victims

by MICHAEL BROOKER

A group of 28 Harding students and five faculty members raised $2,000 to help those hardest hit by the ice storm that hit the state of Arkansas last weekend.

The money raised was to help those in rural areas and helping them with food and shelter. The group consisted of top students from Harding's Administration, Harding's music department, and Harding's economics and business students.

The president of the group, Mark Burks, said, "We were able to buy food, clothes, and other necessities for those in need." The group used their personal vehicles to deliver the items to those in need.

The money was raised through a bake sale, a car wash, and a clothing drive. The group also received donations from the community.

In addition to the money raised, the group also provided emotional support to those affected by the ice storm. Members of the group visited those in need and helped them with anything they needed.

The group plans to continue to help those affected by the ice storm by providing food, clothing, and other necessities. They also plan to continue to provide emotional support to those in need.

In conclusion, the group of 28 Harding students and five faculty members were able to raise $2,000 to help those affected by the ice storm. They provided both financial and emotional support to those in need. The group plans to continue to help those affected by the ice storm in the future.
Brain tumor forms after experimental therapy

After receiving experimental injections of fetal stem cells to treat a fatal brain disease, tumors formed in the child's brain and spinal cord, neuroscientists reported Tuesday.

This is the first documented case of a human brain tumor after therapy with fetal stem cells. The tumor is benign and slow growing.

The child, who received treatment, is being kept anonymous, but reports reveal that he has a genetic disorder called alagille syndrome, or A1, This disease causes degeneration of a vital brain region and can lead to disabilities such as liver disease and hearing loss. As age grew, the boy and family traveled to Russia to receive treatments on Russian children with the same disease.

These cells were injected again when the boy was a year old.

The Europa Jupiter science mission, made after the agencies involved, 'The Europa Jupiter for science missions at the agency's headquarters in Washington, D.C. would allow the agency to conduct the mission.

The meetings were held after the agencies sent the mission proposals to Jupiter on top of the fifth rockets.

"The decision means a revives situation for all parties involved," said an NASA official.

NASA's associate administrator for science resources at the agency's headquarters in Washington, D.C., said:

"We will continue to look into the launch plans at 2020, the Jupiter System mission would reach Jupiter by 2020, and the Titan Saturn System would arrive around the year 2030.

If plans proceed, NASA could spend around $53 billion, while the ESA would spend around $51 billion.

Recovery bill funds public education

When the economic recovery bill passed last week, $100 billion was allocated to education in an effort to help stabilize state budgets.

A total of $544 billion will be used to help offset state budget cuts, with $379 billion going toward K-12 and higher education.

With $5 billion set aside for incentive grants that allow the Secretary of Education, state and school district innovation will be encouraged. The remaining $59 billion will go to important improvements in the field's modernization.

Elementary and secondary schools will receive $25 billion to fund programs for Children Left Behind and special education, and $400 million will go to federal programs to reform teacher pay and state data systems.

$52 billion has been set aside to help higher education in order to cover a shortfall and increase the value of Pell Grants to $5,600.

$4 billion will go to Head Start and Early Head Start education programs.

Sea turtle given prosthetic fins

A sea turtle in Japan will be fitted with orthotic prosthetic fins to help it walk, a Japanese conservation group announced Monday.

Special attention is being given to the female turtle, which was found stranded on a beach.

So far, news reports allow her to climb up, or on a beach and lay eggs.

PIANIST: Fan talks piano with music majors after performance

CONTINUED from page 1A
Curiously, the music was set to a melancholy mood and the only line of the sonata's first movement that the music could be described as 'crazed' was the last chorus. The mood was set for the music that followed, but the last line of the song was 'crazed' as well.

The mood of the song changed throughout the piece. The music was more 'crazed' in the second movement, but then it became more 'melancholic' in the third movement. The music was 'crazed' again in the fourth movement, but then it became 'melancholic' again in the fifth movement. The music was 'crazed' once more in the sixth movement, but then it became 'melancholic' once more in the seventh movement. The music was 'crazed' for the last time in the eighth movement, but then it became 'melancholic' for the last time in the ninth movement.

The mood of the piece changed throughout the performance. The music was more 'crazed' in the first quarter of the piece, but then it became more 'melancholic' in the second quarter of the piece. The music was 'crazed' again in the third quarter of the piece, but then it became 'melancholic' again in the fourth quarter of the piece. The music was 'crazed' once more in the fifth quarter of the piece, but then it became 'melancholic' once more in the sixth quarter of the piece. The music was 'crazed' for the last time in the seventh quarter of the piece, but then it became 'melancholic' for the last time in the eighth quarter of the piece.

The mood of the piece stayed the same throughout the performance. The music was more 'crazed' in the first half of the piece, but then it became more 'melancholic' in the second half of the piece. The music was 'crazed' again in the third half of the piece, but then it became 'melancholic' again in the fourth half of the piece. The music was 'crazed' once more in the fifth half of the piece, but then it became 'melancholic' once more in the sixth half of the piece. The music was 'crazed' for the last time in the seventh half of the piece, but then it became 'melancholic' for the last time in the eighth half of the piece.

A! laws sometime conflict with interpretations of issues outside the realm of science, such as the origin and nature of God and humanity. In fact, the Bible does not try to impose a scientific worldview, because a person's view of creation is a matter of faith. The Bible represents the point of view of the ancient Hebrews and is meant to guide believers in their daily lives. In science, the same concepts are expressed in a different way, often through mathematical models and theories that require careful consideration and verification through experiments and observations. The tension between science and religion is not new and has been a topic of discussion for centuries. In recent years, the tension has been heightened by the rise of creation science, which posits that the biblical account of creation is a scientific explanation for the origins of the universe and life on Earth. Some people believe that the Bible provides a complete and sufficient explanation for the origins of the universe and life, while others believe that science is the only way to understand the complexities of the universe. The debate between science and religion is a complex one, and it is important to consider both perspectives in order to gain a deeper understanding of the world we inhabit.opinion

Skip Little Rock: Go Local!

Tired of Little Rock shopping excursions taking a quarter tank of gas? Go local! Check out these stores for some of Searcy's hidden retail treasures.

Gregory's, Act II, & The Serendipity Shoppe,

Located at 213 W. Arch St., are Gregory's, The Serendipity Shoppe and Act II. Gregory's, with its Italian flair, offers custom designed jewelry and gourmet food, cheese and coffee. A bridal registry is also available.

The Serendipity Shoppe offers music boxes, dolls, stationary and unique Searcy gifts for birthdays and weddings.

Act II, an extension of Sowell's, offers greatly reduced furniture items. It is a serve-yourself room, with payment available at Sowell's furniture in downtown Searcy.

Ultimate Outdoors

Ultimate Outdoors, located at 608 S. Main St., is Searcy's one-stop-shop for hunting and fishing needs. Ultimate Outdoors guarantees a knowledgeable, highly experienced and friendly staff that is willing to answer any questions about equipment and supplies. The store carries everything from archery equipment, as well as waders and boots from LaCrosse, Stab, Weathertouch and Browning.

Fishing supplies include, but are not limited to, a wide variety of Umpqua flies, Angler's Image lines and accessories and Rio brand fishing line.

The Tangerine Turtle

The Tangerine Turtle, located at 3402 E. Race Ave., is a store designed specifically for baby and maternity needs. This includes maternity clothes, baby clothing, various baby items, strollers, car seats, cribs, baby clothes, bottles, baby gifts and more. On the back wall, you will also find an extremely diverse selection of bar stools and men's ties is just about every color, shape, size and model imaginable.

Bible House Inc.

Bible House Inc., located at 907 S. Main St., is Searcy's "Bible superstore." Bible House offers a variety of books, including best-seller "The Shack" and a selection of well-known author Max Lucado. Also available is a variety of racing, such as active Flyleaf, Casting Crowns, Hillsong and more. The store also carries a variety of inspirational gift ideas, clothing, the Witness Collection, Kerusso accessories and jewelry. For those interested in teaching, a variety of teaching aids and ideas, as well as entire sections of the store dedicated to children, is available.
Darby takes advantage of second senior season

Basketball team, but this season’s been different for the women’s large factor, however, is that played while the students were attendance at men’s and women’s are known for drawing large lately the Rowdies haven’t been arguably the toughest crowd in portraiture the Harding University Rhodes Rowdy. The Lady Bison’s only loss this season with a 7-2 victory the Lions remained perfect on to Arkansas-Ft.

Tennis teams

Bison Notes

Men’s Tennis

The Rowdies men’s tennis team started off the season with a win against Augusta Mountain. However, they lost 4-3 to Georgia Tech.

Lady Bisons Get Sixth Win

The Lady Bisons’ season remained perfect with a win over John Brown University, and the Lady Bison won two of three singles matches to move to a score from home and 6.

Bench Comes Up Big in Key Win

The Lady Bison is known for drawing large attendance at men’s and women’s sports, and it has been a tough crowd in recent years. The bench was told to do more things differently, and one of those changes is to have more people to come to the games and just have fun. Griffin’s role is also considered one of the most important in the sport, as he has been a big part of the growth of the sport.

Griffey’s career not tarnished by steroids

Griffey’s most memorable moment was when he hit a home run in the 1998 World Series. However, he also admitted to using steroids in the past, which has caused some controversy. Despite this, Griffey’s career has been one of the greatest in baseball history, and he is considered one of the greatest home run hitters of all time.

Griffey’s swing is also considered one of the most beautiful swings of all time. He has hit more home runs than anyone else, and he has been a key figure in the growth of the sport. His career has been marred by injury, but he has continued to hit at a high level. He is considered one of the greatest players to ever play the game, and he has left a lasting legacy on the sport.

Anna Shaffer, a junior theater major, has combined her love of theater with other people's artistic talents for film and music to participate in several video projects over the past year.

"Like that outlet because it's really challenging, because the camera can pick up all the small things you do," Shaffer said.

"I think that outlet because it's really challenging, because the camera can pick up all the small things you do," Shaffer said.

Shaffer said acting emphasizes relationships and working with others and that is why it has helped her develop her interpersonal skills.

"I think that outlet because it's really challenging, because the camera can pick up all the small things you do," Shaffer said.

"I think that outlet because it's really challenging, because the camera can pick up all the small things you do," Shaffer said.

Shaffer said that working with people in the entertainment industry, such as acting and music, has helped her develop as an artist and a performer.

America and swing and stretch and fail, and then rise for the next round. This helps your outlook on life. It helps you enjoy the little things, because you can see them as part of a larger whole.

"After a while my dad took me to the city. We would try to finish it. She’s used to living in a rural environment. She didn’t speak the language, and she didn’t know what to expect. She said it was different from anything she had ever known, but it was both exciting and terrifying.

At college, Mosby said she decided to fully develop her Korean identity. Mosby didn’t like the term "Korean," and she didn’t want to assimilate into mainstream American culture. Instead, she embraced her Korean heritage and began to live in a way that reflected her cultural background.

Mosby said that when her family moved back to the United States in June of 2007, she was a changed person. She was able to speak Korean and fully experience life in a Korean way.

"It was so different, but it was also so comforting," Mosby said. "I felt like I belonged there."

Despite the challenges of moving back to the United States, Mosby was able to make a successful transition. She said that the people, the relationships, and the culture had all contributed to her success.

"It’s a lot easier in Korea, because people are more open to new things," Mosby said. "I think it would be really hard to be a teacher in Korea, but it would be much more easy to be a student."

Shackelford said that the pain from a “small” would manifest itself and cause challenges, but as a problem with his vision, the pain was too severe to be taken lightly.

“Now that he was there intellectually ... that was being his life at all, he was there intellectually ... and I am a huge believer in the Lord,” he said.

Wornock sent a Facebook group in the “Robbie time” that has included both the Splinter cup and the world.

“...it's been so great to be a part of the journey of Robbie's life,” Wornock said.

“...that's so unbelievable,” Wornock said.

“...it was just a time to reflect and know how many volunteers he got,” Wornock said.

The total number of volunteers raised by Bobbie and the Shackelfords, which now stands at 60,000,000, is committed to continue for the life of Bobbie. They want to get more information to this Facebook group “Please Bobbie.”

“...it's been a huge challenge, but not as great a challenge as that of seeing him again,” Wornock said.

“...he has always been strong and has always been strong throughout the process. He was scared before we even said goodbye,” Wornock said.

“...he was there intellectually ... that was being his life at all, he was there intellectually ... and I am a huge believer in the Lord,” he said.

“...it was just a time to reflect and know how many volunteers he got,” Wornock said.

“...that's so unbelievable,” Wornock said.

“...it was just a time to reflect and know how many volunteers he got,” Wornock said.

“...he has always been strong and has always been strong throughout the process. He was scared before we even said goodbye,” Wornock said.

“...it was just a time to reflect and know how many volunteers he got,” Wornock said.

“...that's so unbelievable,” Wornock said.
