# STUDENT INDEX

# DEFINITIONS

## *2020-21 EDITION*

### Active Cases

Students or employees in isolation due to a positive COVID-19 test.

### Close Contact

Someone who has been within 6 feet of an infected person for a cumulative total of 15 minutes or more, with or without a cloth face mask, over a 24-hour period starting from 2 days before illness onset until the time the person who has tested positive is isolated.

### Family Unit

Members of the same house, suite or room, are considered “family” and are therefore not required to wear face masks or social distance in the living quarters.

### Herd Immunity

A situation in which a sufficient proportion of a population is immune to an infectious disease (through vaccination and/or prior illness) to make its spread from person to person unlikely.

### Isolation

Those who test positive for COVID-19 must be isolated. Isolation lasts 10 days from either onset of symptoms or a positive COVID-19 test and continues until you are fever-free for 24 hours (without fever-reducing medications) and symptoms are improved.

# Mask Mandate

Required face coverings over nose and mouth in large groups or public areas.

# Quarantine

Anyone who has been in close contact with someone who tests positive for COVID-19, or is awaiting COVID-19 test results, must be quarantined according to guidelines set forth by ADH and/or CDC. Standard quarantine procedure is 14 days from the day of exposure.

# Social Distancing

Maintaining a minimum of 6 feet of distance from members outside of living situation to prevent the spread of infectious diseases.

# Zoom Fatigue

Feelings of exhaustion due to the overuse of virtual learning platforms.
